Can non-profit provide 501c3 certificate?

Yes

Describe your team's community service project. Who did it help and how?

The Alexander Central Cross Country Team volunteered with MedAssist Mobile Pharmacy, a service provided by Catawba Valley Health System at First United Methodist Church of Taylorsville on Saturday, September 12, 2026. There were several clinics that were provided in this event such as free dental care and eye exam services. The Cross Country Team helped with the MedAssist Mobile Free Pharmacy by handing out pre-packaged bags of over the counter medicines for both adults and children including allergy, cough and cold, pain relief, vitamins, children's medicines, and reading glasses. They also filled medicine bags for walk-ins from the community who had not pre-registered online. Student athletes also helped to break down tables and pack up left-over medicine that was loaded on the truck to send back to Charlotte headquarters. This service project was able to help 700 people in our community of Taylorsville. There were many elderly and families with small children and babies that were served during this charity event.

Why did you pick this project?

The Alexander Central Cross Country Team selected to participate in volunteering for MedAssist Mobile Pharmacy for our community because the student athletes wanted to be part of a service project that would impact the most people in our community. Many of our community members are from low- socioeconomic backgrounds and require aide to provide the necessities such as food, housing, and medical assistance. Student athletes wanted to help with a project that would impact all age groups within the community from the elderly to small children.

How many students are on your team, and how many participated in the service project?
